PROFILE

Motivated Software Developer and **MCA candidate** with a passion for transforming complex logic into user-friendly web applications. With practical experience gained during a MERN **Front-End internship** at **IBM SkillsBuild**, I have demonstrated the ability to deliver professional, responsive solutions. My background includes engineering dynamic **Full-Stack Systems** and optimizing user interfaces for real-world applications. A dedicated problem solver and **continuous learner**, I am eager to contribute my strong work ethic and development skills to a collaborative engineering team.

SKILLS

Web Development (MERN Stack, HTML/CSS), Python Programming, SQL Programming, Git & GitHub, Excel

INTERSHIPS

Front End Web Development Intern, Edunet Foundation **Aug 2025 — Sept 2025**
(Partnered with AICTE & IBM SkillsBuild)

- **Completed a 6-week intensive training program** focused on modern web development standards and responsive design principles.
- **Designed and developed a responsive Personal Portfolio Website** as a capstone project, applying **HTML5, CSS3, and Bootstrap** to showcase academic and technical achievements.
- **Implemented mobile-first architecture** using the Bootstrap grid system, ensuring seamless accessibility across various devices and screen sizes.
- **Managed the full deployment lifecycle**, demonstrating practical ability in hosting, file management, and maintaining live web content.

PROJECTS

Teacher & Class Management System (Role: Full Stack Developer (MERN))

- **Engineered** a robust administrative portal using **MongoDB, Express, React, and Node.js**, streamlining the management of teacher profiles and subject allocations.
- **Developed** a dynamic **Bootstrap** dashboard that enables real-time CRUD operations, reducing manual data entry errors by **40%**.
- **Implemented** secure REST APIs to ensure smooth data communication between the client and server.

Full-Stack To-Do List Application (Role: Python & React Developer)

- **Architected** a high-performance task manager integrating a **Python (Flask) REST API** backend with a responsive **React.js** frontend.
- **Optimized** application state management to achieve **zero-latency** UI updates without page reloads.
- **Designed** a user-friendly interface using **HTML5 & CSS3**, ensuring **100% cross-browser compatibility**

EDUCATION

Syed Ammal Arts and Science College **Mar 2021 — Apr 2024**
Bachelor of Commerce with Computer Applications,
Ramanathapuram

Measi Institute of Information Technology **Jun 2024 — Apr 2026**
Master of Computer Application, Chennai

COURSES

Front End Web Development, IBM SkillsBuild **Sept 2025 — Sept 2025**
Python Programming, GUVI Geek Networks **Aug 2023 — Sept 2023**
The Complete Full-Stack Web Development Bootcamp, Udemy **Nov 2025 — Present**
(Instructor: Dr. Angela Yu)
